

Enertech Welcomes Mike Grossman as Director of DAS & Small Cell Solutions

NEW BRAUNFELS, TX, August 6, 2019 – Enertech is pleased to announce and welcome Mike Grossman to Enertech as Director of DAS & Small Cell Solutions. In this role, he will be responsible for providing strategic direction and execution for all DAS & Small Cell programs. He brings 23 years of wireless industry experience, with the last 15 years focused on DAS/ODAS solutions. Mike has developed valuable relationships with carriers and integrators throughout his career. His knowledge, experience, and alignment to Enertech's Core Values, gives us confidence that he's the right person to lead Enertech's DAS & Small Cell Division into the future.

Mike's ODAS career began in 2005, working in South Florida, Miami Beach, and West Palm Beach. He then spent two years with a neutral host integrator building ODAS networks at Houston Texas Medical Center, the French Quarter in New Orleans, LA, and Denver Metro. His career includes nine years managing hundreds of ROW ODAS Network fiber and node installations in multiple states.

His expansive project portfolio includes college stadium and campus wide ODAS installations, DAS, Small Cell and CBRS nodes for INTERNATIONAL SPEEDWAY CORP owned NASCAR tracks, and resort wide ODAS and Small Cell networks for Vail Corp Ski Resorts. Mike's team was tasked with creating solutions that delivered expanded connectivity to sports enthusiasts and thrill seekers while providing guests with a safe, world-class experience.

"Mike's extensive industry experience will provide Enertech leadership and direction to develop our Small Cell & DAS program. I look forward to partnering with Mike on this venture," states Jamie Recker, VP of Operations.

About Enertech:

Enertech is a vertically-integrated provider of wireless infrastructure solutions to the telecommunications industry. Comprehensive services include site development, engineering, structural modifications, maintenance, technology upgrades, turnkey site builds, and equipment installation and decommissioning. Enertech's customers include the nation's leading telecommunication carriers, tower owner/operators, equipment manufacturers, and tower construction contractors. The Company was founded in 2008 and is headquartered in New Braunfels, a suburb of San Antonio, Texas. Enertech has additional locations in Austin, Houston, and Dallas, TX, and has expanded their presence across the Southern United States with facilities in Phoenix, AZ, Albuquerque, NM, and Lafayette, LA.
